Sidney Lanier High School
Library Media Center Mission

Sidney Lanier High School’s (SLHS) mission is to support and enhance the curriculum by providing educational resources that are current, informative, and enriching for the students, faculty, staff and stakeholders.

SLHS Library Media Center seeks to instill in students an interest in learning and seeking knowledge from a variety of resources. The SLHS Library Media Center will promote a love of reading for enjoyment and delight.

At Sidney Lanier High School’s Library Media Center, you will find an inviting, comfortable and stimulating atmosphere where faculty and students are able to effectively use learning resources. Our library media program is a vital part of the total education program of the school and encompasses the needs of faculty, staff, students, and stakeholders.

The media center staff uses the Atrium Automated System that allows extensive management of the collection, statistics and check in/out services to our patrons. The resources available are hardback and paperback books, eBooks, periodicals, reference items, computers, and videos. In
addition to these resources, the Alabama Virtual Library is one of the many resources available as on-line information services for the students and faculty.
